The 23rd edition of GLSVLSI will be held in Paris, France and collocated with the ACM European Computing Research Congress (ECRC), http://ecrc.acm.org. Original, unpublished papers describing research in the general area of VLSI are solicited. Both theoretical and experimental research results are welcome. Proceedings will be published by the ACM and will be available through the ACM Digital Library. For more information, visit http://www.glsvlsi.org/.

Program Tracks:
- **VLSI Design**: design of ASICs, microprocessors/micro-architectures, embedded processors, analog/digital/mixed-signal systems, NoC, interconnects, memories, and FPGAs.
- **VLSI Circuits**: analog/digital/mixed-signal circuits, RF and communication circuits, chaos/neural/fuzzy-logic circuits, high-speed/low-power circuits.
- **Computer-Aided Design (CAD)**: hardware/software co-design, logic and behavioral synthesis, logic mapping, simulation and formal verification, layout (partitioning, placement, routing, floorplanning, compaction), algorithms and complexity analysis.
- **Low Power and Power Aware Design**: circuits, micro-architectural techniques, thermal estimation and optimization, power estimation methodologies, and CAD tools.
- **Testing, Reliability, Fault-Tolerance**: digital/analog/mixed-signal testing, design for testability and reliability, online testing techniques, static and dynamic defect- and fault-recoverability, and variation-aware design.
- **Emerging Technologies**: nano technology, molecular electronics, quantum devices, biologically-inspired computing, CNT, SET, RTD, QCA, VLSI aspects of sensor and sensor networks, and CAD tools for emerging technology devices and circuits.
- **Post-CMOS VLSI**: evolutionary computing, optical computing, quantum computing, reversible logic, spin-based computing, biological computation, nanotechnology, molecular electronics, quantum devices, biologically-inspired computing. Emphasis should be on the analysis, novel circuits and architectures, modeling, CAD tools, and design methodologies.

Paper submission deadline: December 15, 2012
Acceptance Notification: February 15, 2013
Camera-Ready Paper Due: March 1, 2013

Paper Submission: Authors are invited to submit full-length (6 pages maximum), original, unpublished papers along with an abstract of at most 200 words. To enable blind review, the author list should be omitted from the main document. Previously published papers or papers currently under review for other conferences/journals should not be submitted and will not be considered. Electronic submission in PDF format to the http://www.glsvlsi.org website is required. Author and contact information (name, street/mailing address, telephone, fax, e-mail) must be entered during the submission process.

Paper Publication and Presenter Registration: Papers will be accepted for regular or poster presentation at the symposium. Every accepted paper MUST have at least one author registered to the symposium by the time the camera-ready paper is submitted; the author is also expected to attend the symposium and present the paper.
