The 26th edition of GLSVLSI will be held in Boston, Massachusetts, USA. Original, unpublished papers describing research in the general areas of VLSI and hardware design are solicited. Both theoretical and experimental research results are welcome. Proceedings will be published by the ACM and will be available through the ACM Digital Library. Please visit http://www.glsvlsi.org/ for more information.

In addition to the traditional topic areas of GLSVLSI listed below, papers are solicited for a special theme of “Hardware and System Design for Security and Privacy”. We anticipate a special issue of a journal on the same topic for which selected papers related to the special theme will be invited to submit extended versions for consideration.

Program Tracks:

- **VLSI Design**: design of ASICs, microprocessors/micro-architectures, embedded processors, analog/digital/mixed-signal systems, NoC, interconnects, memories, and FPGAs.
- **VLSI Circuits**: analog/digital/mixed-signal circuits, RF and communication circuits, chaos/neural/fuzzy-logic circuits, high-speed/low-power circuits.
- **Computer-Aided Design (CAD)**: hardware/software co-design, logic and behavioral synthesis, logic mapping, simulation and formal verification, layout (partitioning, placement, routing, floorplanning, compaction), algorithms and complexity analysis.
- **Low-Power and Power-Aware Design**: circuits, microarchitectural techniques, temperature estimation/optimization, power estimation methodologies, and CAD tools.
- **Testing, Reliability, Fault-Tolerance**: digital/analog/mixed-signal testing, design for testability and reliability, online testing techniques, static and dynamic defect- and fault-recoverability, and variation-aware design.
- **Emerging Technologies & Post-CMOS VLSI**: nanotechnology, molecular electronics, quantum devices, biologically-inspired computing, spintronic technology, CNT, SET, RTD, QCA, VLSI aspects of sensor and sensor networks, etc. Emphasis should be on the analysis, novel circuits and architectures, modeling, CAD tools, and design methodologies for emerging technologies.

**Paper Submission deadline**: December 11, 2015
**Acceptance Notification**: February 12, 2016
**Camera-Ready Paper Due**: March 11, 2016

**Paper Submission**: Authors are invited to submit full-length (6 pages maximum), original, unpublished papers along with an abstract of at most 200 words. To enable blind review, the author list should be omitted from the main document. Previously published papers or papers currently under review for other conferences/journals should NOT be submitted and will not be considered. Electronic submission in PDF format to the http://www.glsvlsi.org website is required. Author and contact information (name, affiliation, mailing address, telephone, fax, e-mail) must be entered during the submission process.

**Paper Publication and Presenter Registration**: Papers will be accepted for regular or poster presentation at the symposium. Every accepted paper MUST have at least one author registered to the symposium by the time the camera-ready paper is submitted; at least one of the authors is also expected to attend the symposium and present the paper.
